Alexandria, Egypt

Summary

I am a committed and enthusiastic Software Engineering student with practical experience in delivering programming instruction to a wide range of learners, from beginners to those at an intermediate level. I possess strong communication skills that enable me to effectively simplify and convey complex technical concepts in an accessible and comprehensible manner. With a solid foundation in core programming principles, Object-Oriented Programming (OOP), and software development practices

Projects

Library Management System

- Built a library management system using **Java** and **Swing GUI**.
- Implemented book cataloging, member management, loan tracking, and report generation.
- Designed a user-friendly GUI with structured navigation and reporting features.

Student Gate

- Developed an e-commerce and student service platform integrating a food court, student material portal, events, and university features.
- Designed and implemented both frontend and backend using modern web technologies.
- Implemented authentication, data management, and system integration with university infrastructure.

Education

Alexandria National university, Faculty of Science
Bachelor’s degree in software engineering and multimedia

Alexandria, Egypt
09/2023 - 06/2027

Skills

Programming Languages: Java, JavaScript , c++, c# . python

Web dev using : Html , CSS, JavaScript Software Development: Object-Oriented Programming (OOP), GUI Design (Swing)

Version Control: Git, GitHub
